PROFILE

I am a strong, skillful, and self-organized software developer with 5 years experience of developing infrastructure-related components platform, optimizing the existing environments. Have strong scripting knowledge. Good understanding of Infrastructure-as-a-Code concepts.

EXPERIENCES

2022 - Present

Bincom Dev Center

DevOps Engineer

- Test programs to ensure usability and safety.
- Modify current software in order to improve performance, correct errors, and integrate new hardware.
- Lead small teams dedicated to completing software patch projects.
- Use fast experimentation to build the best product for the company’s needs.
- Wrote computer programs designed to fulfil the needs of the corporation.

2021 - 2022

GTEXT Homes

Junior DevOps Engineer

- Set-up, maintenance and ongoing development of continuous build/ integration infrastructure
- Developing pipeline for computer vision applications
- Optimize the existing environments/structure
- Establish and strengthen the security notification and management tools
- Participate in technical discussions to aid system design, analysis, and troubleshooting

EDUCATION

YABA College of Technology

2019 - 2021 | Bachelor in Computer Engineering

Port Harcourt Polytechnic

2015 - 2017 | Diploma in Computer Engineering

SKILLS

- Knowledge and hand-on experience with operating systems (maintenance, troubleshooting)
- Strong ops skills and support mindset
- Deep understanding of modern monitoring concepts
- Experience with Databases

TOOLS

- Version control
- Continuous Integration servers
- Configuration management
- Deployment automation
- Containers
- Infrastructure Orchestration
- Monitoring and analytics
- Testing and Cloud Quality tools
- Network protocols

2018 - 2021

Showgear Limited
Junior software developer

- Deliver the project from design to testing, including new programs, enhancements, and modifications
- Monitor the performance and test the server
- Participate in estimation and planning sessions
- Work closely with the Product team to deliver quality features in high-quality code and best practices
- Contribute to development of technical project documentation and user documentation
- Drive major architectural changes as we scale to improve our engineering velocity

2016 - 2017

Orit-Rek Enterprises
Technical Support

- Oversaw installation of software programs and hardware systems to meet requirements.
- Collaborated closely with upper management to drive strategy through development and implementation of new processes.
- Organized system infrastructure documentation and operating procedures, strengthening controls and enhancing overall performance.
- Maintaining computer networks including mainframes, VPNs, routers and other physical hardware
- Installing and configuring network equipment
