About Me

I'm a software developer with more than 3 years of work experience. Though my area of specialization is frontend, I have knowledge and experience in both backend and frontend web development. I have honed my skills in HTML, CSS, JavaScript and React Native in building web and cross platform applications. In addition to being aesthetically pleasing, my aim is to design user interfaces that are easy to use and available to people with a variety of skill levels.

Professional Experience

June 2023 – present

Abuja, Nigeria

Huiospay (Payment Gateway), Frontend Developer [🔗](#)

- Identified and addressed performance bottlenecks, optimizing the application for speed and responsiveness.
- Collaborated with cross-functional teams, including product managers and backend developers and graphic designers to define project goals and requirements.
- Ensured proper handling of sensitive information and implemented encryption for secure communication.
- Documented the codebase thoroughly to facilitate ease of maintenance and future development enabling a drastic increase in project scalability by 35%.
- Improved platform performance, resulting in a 20% reduction in page load times.
- Implemented dynamic form validation and error handling to enhance user guidance during the payment process.

June 2023 – present

Abuja, Nigeria

Huiospay (Payslate), Frontend Developer [🔗](#)

- Proposed a modular scalable architecture to accommodate the platform's multifaceted functionality and Integrated secure payment gateways to facilitate smooth and secure financial transactions.
- Implemented a user-friendly dashboard that provides quick access to payment, service details, personalized settings and ensured that the website adheres to accessibility standards, making it usable for individuals with diverse abilities thereby boosting usability by 30%.
- Conducted performance testing and implemented optimizations to ensure fast load times and a smooth user experience by at least 20%.
- Streamlined auditing and account reconciliation processes, reducing the time required for financial reporting by 40%

Lagos, Nigeria

TechNoob, Software Developer [↗](#)

- Collaborated with backend developers to implement a landing page, admin dashboard and user dashboard using role based routing technique.
- Establish and enforce testing practices, including unit testing, integration testing, and end-to-end testing.
- Implemented multifunctional routing system using react router.
- Developed features for browsing and searching through multiple resources increasing user engagement by 50%.
- Collaborated with UI/UX designers to refine the visual elements and maintain brand consistency and with that user engagement rose by 12%.
- Manage the issue tracking system, prioritize bugs, Break down high-level project goals into actionable tasks and distribute them among team members.
- Work closely with product managers and other stakeholders to understand project requirements.

Abuja, Nigeria

Treep (E-Hailing Service), Software Developer [↗](#)

- Implement and maintain CI/CD pipelines to automate the process of building, testing, and deploying software.
- Foster collaboration between development and operations teams to enhance communication and mutual understanding.
- Work closely with cross-functional teams to ensure smooth coordination across the entire development lifecycle.
- Monitor resource usage and plan for scalability based on current and future needs.
- Implemented interactive elements like animations, forms, and user interface components.
- Ensured cross-browser compatibility and optimized performance for different screen sizes and devices.

Projects

November 2023 –
January 2024

Market place, E-Commerce website [↗](#)

- Contributed to a 20% increase in conversion rates by optimizing the checkout process and improving overall website performance using Next JS performance features.
- Ensured cross-browser compatibility to provide a consistent experience for users on different web browsers.
- Ensured the application adhered to industry-standard security practices to protect user data and financial information.
- Collaborated with backend developers to integrate secure payment gateways for seamless and safe transactions.
- Developed user account functionalities, including profile management, order history, checkout, and Wishlist features.
- Developed features for browsing and searching products efficiently with a robust pagination.

April 2023 – December 2023 **UBEB E-Learning, E-Learning Application** [🔗](#)

- Integrated an admin dashboard to control resources for students.
- Implemented authentication for students using the desktop application.
- Converted the Next JS application to a desktop app using Electron.
- Created a test assessment system on the application for each student.
- Implemented users taking courses and watching videos for each course selected.

Skills

Languages

HTML5, CSS, JavaScript, TypeScript

Stack

React JS, Next JS, React Native, Express, Node JS

Testing

Chrome DevTools

State Management

Redux/Redux Toolkit, Context API

Education

Kwara, Nigeria

Bachelor of Engineering(B.Eng), University of Ilorin

- Assembly Language Programming.
- Data Communication and Computer Networking.
- Reliability and Maintainability of Electrical systems.
