Career Objective

Seasoned, forward-thinking, and self-motivated Software Engineer with over 2 years of practical and professional experience, who has built industry-standard applications with the requisite skills and hands-on knowledge of the software development life-cycle best practices. Consistently recognized as an achiever and competent Software Engineer skilled at using programming languages, logic, and frameworks to solve problems in a fast-paced and deadline-driven environment. Presently seeking a stable Software Engineering position with the aim of utilizing my expertise in developing complex web applications using modern technologies.

Core Competencies and Skills

- ✓ REACT JS Skill Badge – LINKEDIN
- ✓ PHP Skill Badge – LINKEDIN
- ✓ Strong Listening and verbal communication skills.
- ✓ Critical, analytical, and logical reasoning skills for problem resolution
- ✓ Adept in working in both front-end and back-end development processes using PHP and MERN STACK.
- ✓ Excellent organization and planning skills, with the ability to effectively prioritize workload and projects accordingly.
- ✓ Strong knowledge of data structures, system designs and algorithms
- ✓ Excellent communication with local and foreign colleagues
- ✓ Ability to work independently or as part of a team

Career Experience

Full Stack Software Engineer | MACROPAX (Part-Time)

Jul .2023- Present

- Provide support in maintaining existing products to achieve optimization smooth flow.
- I built the back-end structure of MPAX GAMES which is a web VAS gaming application using PHP.
<https://mpaxgames.com/>
- Making use of MERN stack, NEXT JS & TYPESCRIPT to work on projects
- I built a Job Noting application to help job seekers track their job application. I used MERN Stack, React Query for caching request, styled-components for styling and CLOUDINARY for image storage.
<https://mernjobnote.onrender.com/>
- I built a MERN AUTH application using Google FIREBASE authentication and storage. Tailwind CSS was used for styling <https://mern-auth-ge38.onrender.com/>
- I built this E-commerce website using React JS , Tailwind CSS and Daisy UI for styling, REDUX Toolkit for state management and REACT QUERY for caching. <https://lionstoreapp.netlify.app/>. The Back end API endpoints consumed for this project can be found here. <https://documenter.getpostman.com/view/18152321/2s9Xy5KpTi>

Full Stack Software Engineer | RANE INTERAKTIV MEDIEN

Nov. 2022 – June 2023

Duties and Achievements;

- I provided support for all software products as part of my daily routine. Fixing bugs and optimizing software products to make sure processes work smoothly without fail
- I revamped the front end of JUNEBOXES which is a money-making Gaming product, using HTML&CSS, BOOTSTRAP, and PHP. This revamp increased the number of users and revenue generated by a significant percentage. <https://games.juneboxservices.com/>
- I interfaced with external vendors on behalf of the company as the in-house software engineer to discuss specifications for improving the scalability of our products
- I collaborated with my teammates to build a music and video streaming application. My collaboration was done as a back-end developer and I used LARAVEL framework to build RESTFUL API endpoints and AWS S3 bucket for storage for this application called TALENTCROFT <http://views.talentcroft.com/>.
- I provided support on a weekly basis every Friday for the LUCKY ME application, which is a lottery platform for users to win cash every week. – <https://luckyme.ng>
- I built and submitted a full-fledged lottery application for the company as an enhancement and backup for the existing one to avoid any disruption of the lottery process using PHP PDO, HTML, CSS, JAVASCRIPT, JQUERY, and AJAX. <https://github.com/Ucheizzzy/lottery>
- I built HOF which is a charity foundation website using HTML, CSS, BOOTSTRAP, Owl Carousel JAVASCRIPT, and JQUERY <https://foundation.haroldolamilokun.com/>
- I built LITERATE NIGERIA for the company using PHP for form handling and HTML, CSS, BOOTSTRAP, Owl Carousel JAVASCRIPT, and JQUERY <https://literatenigeria.com/>
- I had meetings with the software development team to define the scope and scale of software projects
- I wrote technical documentation for all products

Junior Full Stack Developer | EBS BUSINESS SOLUTIONS LIMITED

Aug. 2022 - Nov. 2022

Duties and Achievements;

- I recreated the merchant register page for users to register and become a merchant on the legacy platform called jollof.com Merchants were finding it difficult to register, so I was tasked with designing and fixing the functionality I did this using the LARAVEL framework, JAVASCRIPT, and JQUERY. <https://testing.jollof.com/merchant/register>
- As a daily routine, I provide support for all software e-commerce applications used by the company
- Developed, refined, and tuned patches and fixes for identified application issues before planning patch deployment.
- I created a restful API with LARAVEL and consumed it with the React JS in the front end using AXIOS.
- I created droplets with Digital Ocean and deployed them to the web server with SSH

Full Stack Software Developer | MOAT ACADEMY FOR DEVELOPERS

April 2022 - July 2022

Duties and Achievements;

- This was an apprenticeship role where I learned and practiced HTML, the inner workings of web applications, and laying out web pages using generic divisions and semantics
- I also practiced and made use of CSS to build demo projects and learned how to build a responsive mobile-first website using BOOTSTRAP, and TAILWIND CSS technologies.
- I also learned and practiced JAVASCRIPT, JQUERY, and REACTJS
- I worked with Databases such as MYSQL and MONGO DB and practiced writing complex queries.
- I worked extensively on PHP OOP programming language using MYSQLI and PDO, and PHP LARAVEL MVC framework.
- I used GIT for version control
- I understood and practiced the Software Engineering life-cycle and principles
- I built NAIJADOCS as a demo project to demonstrate all that I learned. <https://github.com/Ucheizzzy/NAIJADOGSPhp>

Education & Certifications

B.SC. COMPUTER ENGINEERING

2010-2015

University of Lagos, Lagos State.

Full-Stack MERN App Mastery
UDEMY LEARNING
LARAVEL 9 A-Z from Beginner to Advanced
UDEMY LEARNING

MERN STACK COURSE
UDEMY LEARNING
PHP for Beginners
UDEMY LEARNING

Personal Projects

- **My Portfolio** – <https://mruche.vercel.app/>
 - I built this application with the latest NEXT.JS (App router and server actions), TYPESCRIPT, TAILWIND CSS, FRAMER MOTION.
- **Movie-App** – <https://tsmoviesapp.netlify.app/>
 - I built this application with REACT JS using TYPESCRIPT, context API and REDUX
- **Simple Cart Project** – <https://tscartminiproject.netlify.app/>
 - I built this application with REACT JS using TYPESCRIPT, context API and REDUX
- **To-do APP** - <https://tstodoapp.netlify.app/>
 - I built this application with JAVASCRIPT OOP using TYPESCRIPT, HTML\$CSS
- **Mix-Master Project** – <https://mixmasterapiapp.netlify.app/>
 - I built this application using REACT JS and React Query for caching request
- **React Query UNSPLASH Project** – <https://reactqueryunsplashproject.netlify.app/>
 - This is an application used to search for images
 - I built this application using CONTEXT API and REACT QUERY to manage the queries, cache, and states
- **JOBLANE** – <https://joblane.netlify.app/>
 - This is a REACT JS where I used REDUX TOOLKIT for state management and styled-components for styling.
- **NODE JOB API:** <https://jobapi-m20v.onrender.com/>
 - This is a NODE JS/EXPRESSJS API project that is used for creating jobs, editing jobs, getting a single job, and getting all jobs a user created.
 - I demonstrated my knowledge of JSON WEB TOKEN used for modern authentication, CRUD functionality, and swagger UI for documentation
- **NODE JS JWT API:** <https://github.com/Ucheizzzy/jwt>
 - This is a NODE JS/EXPRESSJS API project that is used for authentication
 - I demonstrated my knowledge of JSON WEB TOKEN used for modern authentication
- **NODE JS TASKMANAGER API:** <https://github.com/Ucheizzzy/taskmanagerapi>
 - This is a NODE JS/EXPRESSJS API project that is used to manage tasks
 - I demonstrated my knowledge of CRUD functionality
- **Lion Tours React Application:** <https://liontours.netlify.app/>
 - I built this web application with REACT JS to demonstrate the fetching of data from a third-party API
 - I demonstrated my knowledge of Custom hooks and context API
