

SKILLS

Engineering

- **Enterprise Web Application Development** - Php, Laravel, Nodejs, ExpressJs, GraphQL, Firebase
- **Data Engineering** - MYSQL, PostgreSQL, MongoDB, Firestore
- **Web Client Development** - JavaScript, TypeScript, ReactJs, NextJs, InertiaJs, TailwindCSS
- **Infrastructure** - Git, Docker, Kubernetes, Cloud service providers including AWS and GCP

General

- **Language Skills** - English (fluent)

EXPERIENCE

Upwork

Remote, Contract

Full-stack Developer

2021.09- Present

- Leading a product team and contributed to building a sophisticated identity platform that can be used to generate any type of identifications, transport ticketing, events/concerts ticketing and creates access control and validations for the generated identification.
- Contribute to companywide Back-end service mono repository, team owned Back-end microservices, React web application used by the customers, in-house support and management staffs, native applications used by the workers and facilities.
- Contribute to building and architecting numerous microservice that enabled B2B integration with the company (built a wallet system, value-added services provider integration).
- I conduct feature post-deployment monitoring to ensure that the feature/fix is working as expected in production, and for complex features I normally do a back-test with data collected in production to ensure the feature is serving it intended customer value.
- Participate and contribute to rigorous code review across the team(s). unit test is mandated (except in some cases which you'll need to leave a note stating why adding unit test is impossible). I review not just the code but also the PR description, PR checklist, PR demo video etc.

Technologies: ReactJs, NodeJS, MYSQL, InertiaJS, JavaScript, TypeScript, AWS, Docker, GraphQL, MongoDB, Apache Kafka, Grpc, Kubernetes.

Havilah and Hills Innovative Systems

Port Harcourt, NG

Team Lead

2020.02-2021.09

- Lead the development team in designing, developing, and delivering high-quality software applications using Laravel, AWS, and WordPress.
- Collaborate with cross-functional teams to identify and prioritize project requirements.
- Manage project timelines, resources, and budgets to ensure successful delivery.
- Manage Jira projects, boards, and workflows to ensure effective project tracking and reporting.

Fillyatank

Port Harcourt, NG

Software Developer

2018.03-2020.02

- Write clean, efficient, and well-documented front-end code (HTML, CSS, JavaScript, AngularJS).
- Design and develop server-side logic and database integration.
- Design and implement database schema and structure.
- Ensure continuous integration and continuous deployment (CI/CD).

Technologies: PHP, JavaScript, Laravel, NodeJS, MongoDB, AngularJS, PostgreSQL, AWS, Azure.

Teknohub Consult

Software Developer

Lagos, NG

2017.11-2018.03

- Utilized AWS, allowing our Agile Engineering team to be one of the first to implement its resources, reduce costs, and mitigate risks.
- Created scripts that work with SQL/MySQL databases and various API's to automate data analytics, data curation and report creation for Stakeholders, C-Suite members, and Board of Trustee.
- Contributed to several system design decisions verbally in our meetings.
- Contributed and participated in team code reviews.

Technologies : JavaScript, AngularJS, MSSQL, Asp.Net MVC, C, Laravel PHP, AWS.

Codeplus Academy

Software Apprentice

Lagos, NG

2016.07-2017.10

- Debugged and updated web application software using the Java springboot framework.
- Software architecture and Design.
- Applied the Entrance and Success Criteria of a Milestone Review to develop constraints using MagicDraw's Java API.
- Evaluated criteria to determine maturity level to elevate to the next phase of the milestone review.

Technologies: Java, SpringBoot, MSSQL, MYSQL.

EDUCATION

University Of Port Harcourt

BTech. Geology/Mining Tech

2008.03-2013.09
