Web Developer/Tester

Professional Profile

‘A disciplined, dedicated, self-motivated, goal-driven web developer focused on designing, developing, and deploying scalable and performant web applications across multiple browsers’

Possessing 3+ years of experience working as a freelancer and collaborator in large and small organizations across a few industry sectors such as tertiary, private, consulting and IT. I love to work in a team environment and using my own initiative in taking the right steps to solve complex problems. I am very good under pressure and adhere to strict rules and deadlines. I am ready to apply my passion and love for programming to a talented engineering team to develop quality solutions.

Education and Qualifications

- BSc. (hons) Physics/Electronics, 2:1 - Babcock University - 16 July 2022
Dissertation: *Load flow analysis of an IEEE test bus system using computational methods* ([link](#)).
Modules studied include: Classical Mechanics, Experimental and computational physics, Quantum and solid state physics, Introduction to quantum mechanics, Mathematical methods in physics.
- Certificate: NYSC - NYSC - National Youth Service Corps - Batch C, Stream II. (November 1, 2023)
- Certificate (Completion): Microsoft Office Word and Excel (New Horizons)
- Certificate (Completion): Javascript, React, PHP and Node.js (Programming Hub)
- Programming Coursework: HTML, CSS, JavaScript, Typescript, React, Node, PHP, MongoDB.

Work Experience

Full Stack Developer	Hookik Technologies	June 2024 - present
-----------------------------	---------------------	---------------------

Outline

Working remotely as a full stack developer for a tech startup that specializes in connecting businesses to influencers to promote their products or services.

Key responsibilities

- I contributed by implementing influencer segregation on the back-end and front-end upon influencer login, enabling them to select active channels and provide follower information, as measured by improved user engagement.
- I developed online and offline tracking features and integrated SMS notifications for campaign updates, enhancing overall campaign management for clients.

Web Developer/Digital Marketer	GIL Group	December 2022 - present
---------------------------------------	-----------	-------------------------

Teamsource - GIL Group Subsidiary

Outline

Working as a developer for a digital marketing firm providing marketing services for clients in and outside Nigeria. Reporting to the management, managing, deploying and monitoring all digital products.

Key responsibilities

- I contributed by fixing system bugs and collaborating with digital marketers on new implementations and enhancements to improve website functionality, as measured by increased sales and user engagement.
- I developed code snippets and widgets for driving sales, built an internal tool using Node.js and Puppeteer to scrape product information for optimized content
- Created a bulk-mailing system called TeamSend for marketers. @ (<https://teamsend.teamsource.net>)

Junior web developer, Intern

Codeweb Solutions(startup)

January-July 2021

- Worked as a productive team member to design, code, test, report, and debug operations.
- Fixed bugs from existing websites and integrated enhancements that optimized performance and speed.
- Built a NODE API for handling all client's request and storing sensitive information for a school portal.

Some Personal Projects

HalfCarry (E-commerce/Savings Platform)

Creator, Designer, Developer

February 2023 - present

- Developed a marketplace that allows users to purchase all kinds of products with ease and also providing the option of allowing installment payment for a given period. (link <https://halfcarry.com.ng>) (alternate-link: <https://store.codeweb.com.ng>)

StudentXtra (Financial Management/Savings Site)

Creator, Designer, Developer

September 2022 – present

- Built a savings app for managing the finances of students in a school. (link: <https://studentxtra.codeweb.com.ng>)

Codeweb Student (Student Portal)

Creator, Designer, Developer

March 2023 – present (still managing)

- Built a coding bootcamp web portal for prospective and current students. (link: <https://student.codeweb.com.ng>)

E-natural Skincare E-commerce Site

Creator, Designer, Developer

February 2022 – April 2022

- Built a responsive full-stack application using the MERN stack for a skincare web shop and blog.
- Built a secure RESTful API using tokenized authentication for responding to user requests from the client-side.
- Built a responsive, accessible, and dynamic single page application using React for smooth and fast user interaction.
- Used the material UI kit to create aesthetic graphs, charts, and appealing reusable components in developing the administrative panel of the site.
- Used the redux toolkit to manage the global storage of data within the application.
