Location: Lagos, Nigeria

### **PROFESSIONAL SUMMARY**

Detail-oriented PHP Web Developer with practical experience in building user-centric web applications. Developed two full-stack platforms: FoodieGo, an e-commerce platform for raw foodstuff trade enabling more than 200 users, and Geolife, a Laravel-based land listing system with the capacity to manage over 200 users. Proficient in PHP (Object-Oriented Programming and Laravel), MySQL. Eager to grow within a collaborative team like Fortran House.

### **SKILLS**

#### **Technical Skills:**

PHP (OOP), PHP (Laravel), MySQL, HTML, CSS, JavaScript, jQuery, AJAX, Bootstrap

#### **Soft Skills:**

Analytical Thinking, Time Management, Attention to Detail, Collaboration, Communication

### **PROJECTS**

#### **FoodieGo – E-commerce Platform**

GitHub: [github.com/Willy-sam021/Foodie\\_go](https://github.com/Willy-sam021/Foodie_go)

- Developed a PHP-based platform for trading raw food items such as chicken and fish, featuring over 500 product listings and supporting over 200 user accounts.
- Implemented features including product listings, user registration, shopping cart, order management, and Paystack integration, improving vendor reach by 50%
- Technologies Used: PHP, Object-Oriented Programming (OOP), MySQL, HTML, CSS, JavaScript, jQuery, AJAX

#### **Geolife – Property Listing Platform**

GitHub: [github.com/Willy-sam021/Geolife](https://github.com/Willy-sam021/Geolife)

- Developed a Laravel-based web application to manage and display over 500 potential land listings with image galleries.
- Implemented functionality for users to submit offers, enabling direct interaction on listed properties, and for administrators to manage these offers via a secure dashboard, improving lead management efficiency.

- Technologies Used: PHP, Laravel, MySQL, Bootstrap.

## **EDUCATION**
