Professional Summary

Experienced Full Stack Developer with a strong background in backend development, API design, and scalable web applications. Proficient in **Laravel, Node.js, Angular, React, and MySQL**, with a passion for building high-performance software solutions. Adept at collaborating with cross-functional teams, optimizing system performance, and delivering maintainable code.

Experience

Netplusdotcom | Remote

Full Stack Developer | November 2022 - Present

- Developed microservices using the **Crow framework (C++)** to enhance transaction reliability.
- Built and maintained a **multi-restaurant web application** using **AngularJS, React, and Laravel**.
- Revamped the customer dashboard with **Angular CLI**, improving UI responsiveness and user experience.
- Optimized database queries and designed a **clustered database architecture** to enhance scalability.
- Developed a **SaaS API** using Laravel, facilitating seamless client onboarding.
- Built a **Node.js-powered POS monitoring dashboard** to track transactions in real time.

Aher Technologies Limited | Lagos, Nigeria

Junior Full Stack Developer | January 2020 - October 2022

- Designed and implemented **business management software (ERP)** using **Laravel & Angular**.
 - Developed a **quiz web application** for a high school, incorporating real-time participation and automated scoring.
 - Assisted in database clustering to enhance server response times.
 - Created responsive landing pages for clients using **HTML, CSS, JavaScript**.
 - Collaborated with QA teams to test and deploy new features efficiently.
-

Projects

- **Multi-Restaurant Web Application** (AngularJS, React, Laravel) - Enabled restaurant owners to manage menus, orders, and payments.
- **Event Self Service Rest API (Laravel)** – Enabled Users to create and manage their events with little to no human interaction
- **POS Transaction Monitoring Dashboard** (Node.js) - Provided real-time tracking for transaction activities.
- **Task Management System** (Node.js) - Simplified task assignments with an intuitive interface.
- **RRN Generator** (Crow - C++ Framework) - Developed a unique identifier generator for financial transactions.

Skills

- **Frontend:** React, Angular (CLI and JS), HTML, CSS (Bulma, Bootstrap, Tailwind), SASS, JavaScript
 - **Backend:** Laravel, Node.js, PHP, MySQL
 - **Testing:** Jest, PHPUnit.
 - **Tools:** Git (GitHub, Bitbucket), Crow (C++ framework)
-

Education

Federal University of Technology, Akure, Ondo State, Nigeria.

Bachelor of Technology, December 2019

- **Relevant Coursework:** Web Development, Software Engineering, Database Management, Artificial Intelligence
- **Capstone Project:** Developed an obstacle avoidance system using a particle swarm optimization algorithm in a dynamic environment, implemented using MATLAB. The system achieved a 95% success rate in avoiding obstacles and improved path-finding efficiency by 30% compared to traditional algorithms.
