Objective

- To use my skills in web development to build highly scalable and interactive web applications that solve real world business problems.

Education

- University of Calabar**
Bachelor of Science 2023
3.75

Experience

- Sinfotech Hub** 2022 - 2023
Intern PHP Developer
 - Refactored old codebases, resulting in 40% reduction in code duplication and easier maintenance.
 - Implemented additional features requested by clients, helping them achieve a 10-20% boost in productivity.
 - Handled the upload of completed projects on shared hosting servers to make them go live.
 - Hacked HTML templates and JavaScript codebases to fix design-related issues.
 - Checked console logs and general error log files and reported any issues beyond my skills to senior team developers, resulting in 30% boost in error tracking and debugging.
 - Contributed to open-source PHP/Laravel projects on GitHub to enhance my team work skills.
 - Handled database normalisation designs to implement one-to-one, one-to-many, and many-to-many relationships.
 - Mentored students on basic beginner web development skills thereby helping them to achieve 60% comprehension during classes.
 - Wrote documentation of all features of a project I contributed in order to compile a comprehensive documentation of the entire project.
- Actact Empire** 2024 - 2025
Laravel Developer
 - Build a crypto asset trading platform which consumed Tatum API, Doja Identity API, Paystack online payment API, CoinMarketCap, etc.
 - Built an online students election platform for a faculty in the University of Calabar, resulting in 90% of faculty students voting credibly within the comfort of their homes.
 - Built a simple website-to-WhatsApp crypto trading platform where buyers or sellers are redirected to owner's WhatsApp chat to complete a trade. This lead to a 50% boost in trades.
 - Built a general chat platform with various rooms/categories where users can interact on topics of interest.
 - Built a simple online tax collection system, improving on an already existing project which lacked essential features.
 - Maintained existing client projects by extending and adding demanded features without breaking existing core features.
 - Contributed to various open-source projects on GitHub.
 - Participated in code reviews to identify and resolve any potential bugs.
 - Tracker and resolved Git merge conflicts.

Skills

- PHP Laravel Livewire AlpineJS Tailwindcss Git GitHub HTML CSS JavaScript
