## SOFTWARE ENGINEER

With over 4 years of software development experience, I am a diligent engineer skilled in creating scalable applications using HTML, PHP, Laravel, Dart, Flutter, and Node.js. Proficient in React.js, Vue.js, and Bootstrap, I excel in building intuitive user interfaces, implementing agile methodologies, and improving coding practices.

---

## SKILLS

- |              |                     |              |                       |
|--------------|---------------------|--------------|-----------------------|
| • HTML       | • GIT               | • Express JS | • Flutter             |
| • Javascript | • Github            | • React JS   | • Dart                |
| • PHP        | • AWS/Digital Ocean | • Vue JS     | • Provider / Riverpod |
| • Laravel    | • Server Management | • Tailwind   | • React Native        |
| • Node JS    | • REST APIS         | • Bootstrap  | • Database Design     |

## PROFESSIONAL EXPERIENCE

### INFIS (Infinite fashion solution) Pvt Ltd Fullstack Developer & Team Leader

March 2023 - Present

Team Leader & Full Stack Engineer at INFIS Pvt Ltd (03/23 - Present), skilled in PHP, Laravel, Vue.js, Node.js, Livewire, APIs, Flutter, and server management. Proven track record of leading end-to-end development and delivering successful projects.

Learned:

- Accomplished Team Leader & Full Stack Engineer proficient in PHP, Laravel, Vue.js, Node.js, Livewire, APIs, Flutter, and server management.
- Demonstrated expertise in overseeing end-to-end development processes, ensuring successful project leadership.

### Axnol Digital Solutions Pvt Ltd PHP Developer

March 2022 - April 2023

PHP Developer focused on building dynamic web applications, enhancing codebases, and driving innovation through collaboration and technical expertise.

Improvements:

- Designed and implemented dynamic web applications at Axnol, ensuring seamless functionality and optimal user experience as a PHP developer.
- Collaborated with cross-functional teams to troubleshoot and enhance the existing codebase, showcasing strong problem-solving skills.
- Committed to staying updated on emerging technologies, contributing to driving innovation within the development process.

Junior PHP Developer (Trainee) with experience in crafting engaging user interfaces, optimizing application performance, and integrating features like push notifications.

Learned:

- Acquired proficiency in PHP and utilized it to craft user interfaces designed to engage multiple senses, providing users with distinctive experiences.
- Produced comprehensive manuals for each application, elucidating their operations, functions, capabilities, and features.
- Implemented push notifications seamlessly into applications, contributing to increased user engagement.
- Recognized and addressed bottlenecks in application performance through collaborative efforts with cross-functional teams.

---

## **EDUCATION**

### **VHSS Valancher High School**

Computer Science

- Completed High school in Computer Science, equipped with a solid foundation in programming languages, algorithms, and software development principles. Ready to leverage this educational background as a stepping stone into the dynamic field of software engineering, bringing theoretical knowledge and a passion for crafting innovative and efficient software solutions

---

## **PROJECTS**

### **Social Media Marketing Tool [Link](#)**

- SMM Panel: Streamline your social media management with our SMM panel. Access a centralized platform to effortlessly handle social media services, boosting efficiency in content scheduling, analytics, and audience engagement. Elevate your social media presence with ease and effectiveness

### **ERP (WEB/IOS/ANDROID)**

- I developed a web app and mobile applications for both iOS and Android using Flutter, with a focus on integrating ERP functionalities for streamlined business management. The app enables efficient handling of resources, inventory, and operations, ensuring a seamless user experience across platforms

### **Ecommerce Web App [Link](#)**

- I developed a web app using Laravel and Livewire, focusing on dynamic and interactive user interfaces with real-time features, ensuring smooth and efficient performance for users.

### **Whatsapp Cloud Api Realtime Chat App (Like Wati) [Link](#)**

- I built a web and Android app using WhatsApp Cloud API, featuring real-time chat, push notifications, automatic assignment of employee inquiries, staff performance tracking, multi-agent support, conversation history, and automated replies, offering a seamless and efficient communication experience.
