## ABOUT ME

Passionate front-end developer focused on building responsive, intuitive, and accessible web applications using modern technologies like React, TypeScript, and Next.js. Dedicated to turning ideas into user-centered solutions and continuously improving through hands-on experience and learning.

## EXPERIENCE

### Frontend Developer (Personal Projects)

*Remote · Self-directed*

*December 2024 – Present*

- Developed multiple full-stack web applications including an e-commerce site, social networking platform, and news feed app using modern technologies like React, TypeScript, Firebase, and Tailwind CSS.
- Practiced real-world development workflows such as version control with Git/GitHub, API integration, and responsive design across devices.
- Applied frontend best practices, component-based architecture, and performance optimizations in building scalable and maintainable UIs.

## PROJECTS

**Shop.io** – A fully responsive e-commerce platform with product display, category filtering, and cart functionality.

- Developed product display, category filtering, and cart functionality to simulate a complete shopping experience, using `json-server` for mock backend and API responses.
- Designed and implemented a responsive, mobile-first UI with Tailwind CSS for consistent cross-device performance.

**Slothui** – A responsive social networking app with user authentication, post sharing, and real-time chat.

- Built with TypeScript and Firebase (Auth & Firestore) to enable secure authentication, real-time data syncing, and profile management features.
- Developed a “Find Friends” system and implemented a responsive UI with Tailwind CSS to enhance user engagement and cross-device usability
