Education

State College

O Level Graduate

Sep. 2021 – Aug 2023

Ikeja, Lagos

Relevant Coursework

- Data Structures
- Algorithms Analysis
- API Development
- Backend Development
- Web Development
- Database Management
- Internet Technology
- Web Scraping Techniques

Experience

Careerontrack AI

Sept 2024 — Present

FullStack Engineer

Remote – Canada

- Developed and integrated RetellAI for realistic, voice-based interview simulations, increasing user engagement in prep tools by 50 percent.
- Integrated Gemini AI to deliver intelligent content recommendations (books, tutorials, articles, assets) based on user career paths, boosting user retention by 30 percent.
- Implemented robust AIConversationService and VoiceInteractionService, supporting real-time two-way AI interactions with audio playback and transcription, resulting in a 50 percent increase in voice tool usage.
- Designed modular, reusable components and utilities, reducing code duplication and improving development speed by 20 percent across the team.

TsangRealEstate

Mar 2025 – Aug 2025

Fullstack Developer/Web Scraper

San Antonio (Remote)

- Developed and maintained a modern real estate platform using Next.js, TypeScript, and Tailwind CSS, improving browsing performance and reducing page load time by 40 percent.
- Automated apartment listing updates by integrating Puppeteer + Cheerio for scheduled web scraping, reducing manual entry by 90 percent.
- Integrated Cloudinary for seamless media uploads, Nodemailer for email notifications, and Calendly for one-click meeting scheduling with prospective tenants.
- Set up GitHub Actions for CI/CD pipelines and automated scraping tasks, improving deployment reliability and accelerating delivery cycles by 25 percent.

Projects

Asinlinks - Link Sharing App | *React, TypeScript, Firebase, Context API*

April 2023

- Developed and deployed a dynamic link-sharing web app using React, Firebase, and Google Authentication, attracting 90+ active users with real-time link and profile management.
- Integrated Firebase Analytics to track user behavior and engagement, driving feature improvements that increased session duration by 25 percent.
- Built a responsive, user-friendly interface with customizable backgrounds, link categories, and real-time UI updates; integrated middleware and JWT validation for secure database access.

Asinscrape - Web Scraping App | *Next.js, TypeScript, Tailwind CSS, Puppeteer, Node.js, GitHub Actions*

June 2023

- Developed a real-time web scraping system using Puppeteer and Node.js, automating property data extraction with dynamic updates scheduled every 5–6 hours, reducing manual tracking effort by 90 percent.
- Built a fully responsive frontend with Next.js, React, TypeScript, and Tailwind CSS, enabling users to monitor and trigger scrapes seamlessly through an intuitive interface.
- Automated scraping workflows via GitHub Actions and cron jobs, achieving 99 percent uptime on scheduled data pulls and ensuring consistent, hands-free updates.

Mystore - E-commerce App | *Node.js, React, TypeScript, Paystack, JWT*

Sept 2023

- Built a full-stack e-commerce platform with seamless Paystack integration for secure online transactions.
- Developed user authentication and authorization using JWT for secure login, signup, and access to protected routes.
- Implemented persistent shopping carts, ensuring users can access their cart contents across different devices.

Technical Skills

Languages: HTML, CSS, JavaScript, TypeScript, PHP, SQL, NoSQL

LLMS: OpenAI, RetellAI, GeminiAi, Github-Copilot

Developer Tools: Git, GitHub, NPM, VS Code, Figma, Docker

Technologies/Frameworks: React, Next.js, NestJS, Jest, Puppeteer,

ORM, Google Cloud Console, EJS, Google, AI .
