Professional Summary

Innovative web developer, educator, and community leader with a background in Chemical Engineering.

I specialize in building real-world tech solutions using modern tools like Vue.js, Nuxt.js, and Laravel, with strong integration of SEO, responsive design, and digital marketing strategies. As a passionate advocate for learning and growth, I actively mentor and teach aspiring talents in tech, while managing thriving online communities and programs.

With hands-on experience in web app development, product management, and community building, I bridge technical execution with strategic thinking. I enjoy learning continuously, building meaningful products, and teaching what I've mastered.

Currently exploring dynamic roles in product management and engineering leadership, where I can drive innovation, collaboration, and impact.

Technical Skills

1. Web Application Development

Proficient in building modern, scalable web applications with a focus on performance, responsiveness, and SEO optimization.

- Languages & Technologies: HTML, CSS, JavaScript, PHP, SQL
- Frameworks & Tools: Vue.js, Nuxt.js, Laravel, Git, VS Code
