

Onokome Ogedengbe

(Frontend Developer)

Port Harcourt, Nigeria. | +2348168046099 | faithcol25@gmail.com | [Portfolio](#)

PROFILE:

Frontend Developer with experience in building fast, scalable, and visually compelling web applications using JavaScript, React, Next.js, Tailwind, HTML & CSS. Proficient in component-based architecture, performance optimization, and cross-functional collaboration within agile environments. Exceptional at developing complete product flows, integrating seamlessly with REST APIs, and optimizing UI for accessibility. Successfully led the development of *Bizpadi*, a bookkeeping web app for small businesses, featuring inventory tracking, profit calculations, and persistent session handling.

WORK EXPERIENCE:

Frontend Developer Intern June 2025 – Present GadaHQ

Key Responsibilities:

- Developed and maintained the company's landing page and core web application using Next.js, ensuring fast performance and SEO optimization.
- Built and implemented user authentication flows (sign-up, login, password reset), improving onboarding and security.
- Designed and coded responsive, mobile-first UIs that deliver seamless experiences across devices.
- Created reusable, modular components to streamline development and improve scalability.
- Integrated RESTful APIs to enable real-time data interaction between the frontend and backend.
- Applied React Hooks (useState, useEffect, useContext) to manage state and enhance UI responsiveness.
- Collaborated with backend engineers and designers using Git/GitHub, participating in code reviews and maintaining clean version control practices.

Frontend Developer Apr. 2025 – May, 2025 Bizpadi – Bookkeeping Web App

Tech Stack: React, JavaScript, REST API, CSS

Key Responsibilities:

- Spearhead the frontend development of a comprehensive bookkeeping platform tailored for small business management, driving enhanced financial organization and operational efficiency.
- Architect and deploy scalable features including business registration, inventory tracking, and dynamic profit calculation modules.
- Integrate RESTful APIs to facilitate robust, real-time data synchronization between client and server, ensuring data integrity and persistence.
- Harness React Hooks (useState, useEffect, useContext) to optimize component lifecycle management and deliver fluid UI responsiveness.
- Engineer reusable, modular UI components to accelerate development cycles and uphold codebase maintainability.
- Built responsive and mobile-first design methodologies, delivering flawless cross-device user experiences.

SKILLS:

- **Languages & Frameworks:** HTML5, CSS3, Tailwind, JavaScript (ES6+), React, Next.js
- **Tools & Technologies:** Git, GitHub, VSCode, REST APIs

EDUCATION:

Frontend Engineering May 2025 Altschool Africa

Higher National Diploma – Chemistry/Biochemistry Jun. 2022 Auchi Polytechnic
