+2348063053291 | kebokwufavour@gmail.com | Port Harcourt, Rivers State

Summary

I am a 24 years old fast-paced, creative web developer with 3 years of experience with extensive knowledge of PHP, Laravel, Vuejs, MySQL, .NET, JavaScript, HTML, CSS, Bootstrap CSS, Tailwind CSS, as well as various Microsoft office suite applications like MS-Word, MS-Excel, MS-PowerPoint. Strong proficiency in problem solving, providing solution to complex problems through the best possible minimum approach. I exhibit attention to details, possess a ready to learn mindset.

Experience

Web Developer | 03/2024 – Till Date | AbleCare Enterprise | Rivers State

- Developed and managed a responsive web application to help store owners track inventory, manage sales, and generate daily reports. Implemented secure authentication.
- Developed and managed a responsive web application to for petrol stations to manage their sales records, understand employees' actions as regards to work responsibilities and tasks, ensure easy user experience and smooth user interface.
- Ensuring smooth mail delivery from various web applications to respective users.
- Developed industry-based web apps.
- Learnt a lot from my Team Leader.

Web Developer | 03/2022 - 01/2024 | GETNET TECHNOLOGIES LTD | Warri, Delta state

- Integrated various web services like payment gateways, file/document format converter, into web applications.
- Debugged a loan web application to ensure 100% accuracy in displaying critical data, including total loan amounts received, approved, and applied for, as well as user application history. This meticulous debugging not only achieved complete data accuracy but also notably enhanced user satisfaction and trust in the system's reliability.
- Developed e-commerce web applications for the company's business client, where I successfully implemented strategies (such as introducing a more intuitive navigation system, optimize product listings, and streamlining the checkout process) for users to easily manage products and purchase them.
- Managed various websites ranging from loan application websites, e-commerce websites, civil engineering industry websites, amongst others.

Recent Personal Project

- Chat AI - an AI chat web application developed using Laravel, Vue.js, PostgreSQL, DeepInfra AI API (uses OpenAI models). Used Dockerfile for smooth hosting. *Github link:* <https://github.com/KebokwuFavour/laravel-vue-chat-ai>
- Portfolio – My portfolio web app using VueJS (<https://favourk.vercel.app/>)

Other Freelance Projects

- Bank Application – Managed the easy authentication of respective users, developed easy transfer from one user account to another user account while also implementing One Time Passcode (OTP) via SMS and e-mails for verification using Twilio, managed the overall application and ensure consistent flow and reusable logics
